

Seneca FTI and ICAFe, Inc. supply a wide range of equipment and services to take your process from preparation to completion. Our offerings include surface treatment, sealants and adhesives, lubrication, paint and powder spray booths and curing ovens. Seneca FTI and ICAFe are dedicated to the finishing industry. We have products of the highest quality to meet your process requirements.

- >> SERVICES
- Technical support and customer service
 - System and equipment installation
 - System design solutions
 - Repair services
 - Unique applications & innovative industrial coatings
 - Application Engineering and testing

>> Surface Treatment

- Abrasive Blasting
- Vibratory Deburring
- Sponge Blasting
- Dry-Ice Blasting
- Aqueous Degreasers
- Ultrasonic
- Cabinet Washers
- Dip Agitation

>> Liquid Paint

- Manual Spray
- Automatic Spray
- Bells
- Electrostatic
- Fluid Handling
- Electronic Fluid Proportioning
- Robotics

>> Powder Coating

- Manual
- Automatic
- Batch
- Continuous
- Material Recycle
- Quick Color Change
- Cartridge Booths
- Environmental Rooms

>> Ovens and Heat Processing

- Conventional
- Batch Process
- Continuous Flow
- Burn-off
- Heat Cleaning
- Infrared

>> Sealants, Adhesives & Lubrication

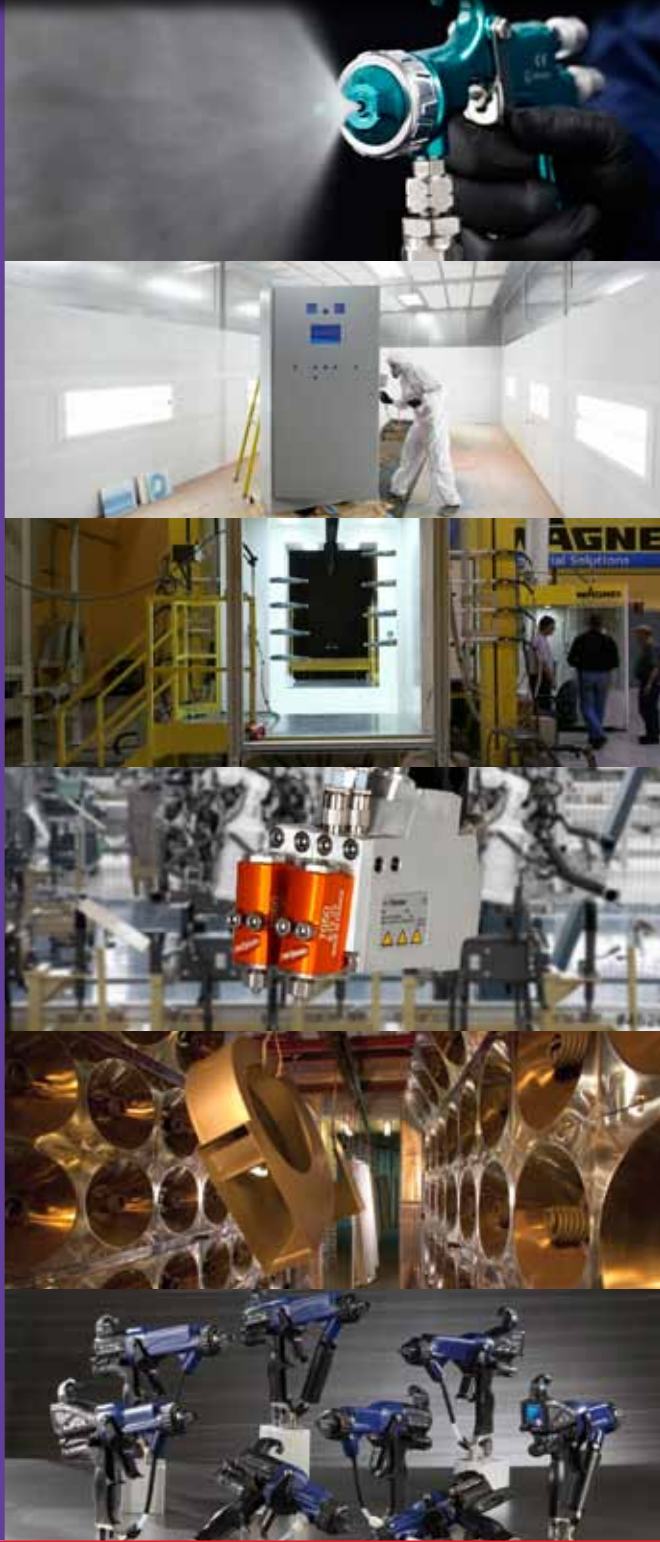

- Hot melt
- Single -or Multi-Component
- Metering Systems
- Continuous Flow
- Mix and Dispense Systems
- Material Transfer

>> Plating

- Filtration Systems
- Pumps & Parts
- Heat Exchangers
- Tanks & Liners
- Air Handling & Scrubbing
- Barrels & Spin Driers
- Waste Treatment
- Anode

Chemical Treatment

Plating

Blasting and Deburring

Blasting and abrasive deburring are often necessary to provide an appropriate surface profile for a finishing process. In addition, they can also be used as effective cleaning techniques. Seneca FTI and ICAFe offer offline batch blasting and deburring equipment as well as the ability to integrate it into your process.

Parts Washing

Seneca FTI and ICAFe work with some of the best names in industrial parts washing. From cabinet washers and ultrasonic immersion diptanks to completely automated conveyorized multi-stage wash units, we are able to offer a cleaning solution that will work with your process.

Chemical Treatment

The cleaning, degreasing, and preparation of parts involves an abundance of chemicals that can greatly impact the economics of a process if it is not run efficiently. We offer solutions to filter, treat, and recycle wash water and various chemistries in order minimize material consumption, environmental impact, and disposal costs.

Plating

ICAFe is a leading provider of plating and aqueous systems and integration services. We deliver systems and services that are custom engineered to meet specific process requirements. Our capabilities allow for the design, engineering, and integration of robust systems that can meet and exceed the needs of virtually any application.
